Our newly upgraded technical care center, allows dental professionals to ensure their instruments always perform at their best and for the longest time possible.
NEW DONOS PERIOSTEAL

FEATURES AND BENEFITS

• Facilitates flap elevation in the posterior areas such as distal sites and lower molars, allowing for lingual and buccal access
• Working ends are not sharp so it does not create injustice to soft tissue
• Different sized working ends allow for elevation in both anterior and posterior
• Working end angulation allows for elevating connective tissue grafts

NEW HU-FRIEDY 3SSENTIAL KIT
BY WERESTORE.IT

THE ESSENTIAL RESTORATIVE KIT
INCLUDING “PLUG&SCULPT” INSTRUMENT

The Hu-Friedy 3SSENTIAL KIT by Werestore.it is the most straight forward kit of restorative ever made, with just 3 essential instruments at once: Anterior, Posterior and Spatula, from the Hu-Friedy Black Line Collection. The three instruments are synergic and interchangeable and the word “Essential” refers to the easiness of all restorative procedures focused on the essential steps to create high esthetic composite restorations while using this kit.

RESTOREITDIN
Kit contains 3 instruments and 1 cassette

NEW TITANIUM IMPLANT SCALERS

PERFORM AT YOUR BEST with Hu-Friedy’s new, state of the art line of Titanium Implant Scalers. Made from the same titanium alloy as implants and abutments, these scalers are expertly designed and manufactured for implant maintenance, debridement, biofilm removal and can be used both supra and subgingival.

- **Improved visual acuity** with Hu-Friedy’s signature Teal colored Anodized Titanium
- **Optimized sharpness** with cutting edges that are finely honed and sharpened post Anodization process
- **Enhanced instrument characteristics** for Implant maintenance with the ability to remove calculus and biofilm
- **Increased instrument value** with the ability to be sharpened at any time to extend the useful life of the instrument
- **Ergonomic sensitivity** featuring our Ergo handle that offers a large diameter and cross/hatch design for maximum tactile grip and support

COLORVUE BIOTYPE PROBE

BY DR. GIULIO RASPERINI & DR. TIZIANO TESTORI

COLORVUE BIOTYPE PROBE

• Colorvue Biotype Probe tips are designed for up to 30 uses*
• Colorvue Biotype Probes fit in Hu-Friedy’s ergonomic, Satin Steel handle that can be reused or recycled.
• The resin tips are safe and gentle to use on all patients.
• Each colored tip is also numbered to aid in differentiation between colors.
• The Colorvue Biotype Probe System features three different colors: White, Green and Blue.

Starter Kit with 3 handles and 12 tips
(4 green, 4 blue, 4 white)
PBTPKIT12

Sugg. Retail Price
Promo
6 171 Kč
4 320 Kč

Using the white probe first, insert it in the gingival sulcus with < 30g of pressure. If it is visible, meaning you can see the color through the gingival tissue, the biotype is thin.

If the white is not visible, use the green probe in the same manner.

If the green isn’t seen through the gingival tissue, use the blue probe.

If the blue is the only color visible through the gingival tissue, the biotype is thick. If no color, even the blue, is visible, the biotype will be very thick.

The most advanced scaler ever

What will the newest, most advanced, sharpest and longest-lasting scaler on the market do for you?

**Help you perform better than ever...**

**STAYS SHARPER EVEN LONGER**

EverEdge 2.0 uses a new, optimized heat control process in order to maintain the hard, sharp edge. This heat control, plus several manufacturing intricacies in Hu-Friedy’s proprietary process, provide the durability needed for effective procedures and continued use.

**UNCOATED PERFORMANCE**

Similar to the original EverEdge technology, our proprietary processing ensures that the superior edge retention & wear characteristics of EverEdge 2.0 will last the entire life of the instrument. Since it’s not a superficial coating, these characteristics can’t be sharpened or scraped away. EverEdge 2.0 scalers can be resharpened at any point to extend their life.

**REVOLUTIONARY TESTING SYSTEM**

Hu-Friedy has invested in a custom blade evaluation system to ensure clinicians are receiving the sharpest possible instruments. Blades from every batch of EverEdge 2.0 are tested right off the factory line to confirm that the sharpness value remains in our target range, averaging 5 newtons of force required to cut the test material.

**NEW FINELY-HONED FINISH**

EverEdge scalers are sharp...EverEdge 2.0 scalers are even sharper. Using an enhanced finishing process, Hu-Friedy’s professional artisans are creating edges that are scientifically measured to be over 60% sharper than the next closest competitor. Less force means easier, more comfortable scaling for the clinician and patient.

**DIAMOND KNURL METAL HANDLE**

The same EverEdge handle you love! The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

---

**Valid for all EverEdge 2.0 Range**

DID YOU KNOW?

All hinged instruments — forceps, rongeurs, scissors, pliers, hemostats, orthodontic pliers, etc. — should be kept lubricated. Regular use of proper lubricants, like Hu-Friedy Penetrating Oil (IPS) and Instrument Lubricant Spray (ILS), will prevent rust, corrosion and stiff joints to ensure smooth operation. All hinged instruments should be sterilised in the open position.

IMS LILAC UTILITY GLOVES: enhance safety in the instrument management cycle

Lilac gloves are for use in the sterilization area and during disinfection processes in the operatory.

- Flocklined nitrile, lilac utility gloves are not made with natural rubber latex and stand out to professionals as the color of dental hygiene
- Resist chemicals better than latex gloves
- Puncture resistant for improved protection against sharps injuries
- Molded texture improves tactile feel and grip
- Can be autoclaved up to 250° F/121°C up to five times

Instrument Lubricant Spray keeps hinged instruments moving freely. ILS does not contain silicone.

Hu-Friedy's Instrument Management System is the most comprehensive, reliable, and complete instrument processing and infection control system on the market today. IMS combines sterilisation, storage and organization of instruments in one integrated system.

Hu-Friedy’s IMS system allows you to focus on your patients rather than wasting valuable time looking for the instruments to complete a procedure.

EXTENDING YOUR INSTRUMENTS LIFE

Our newly upgraded technical care center, based in our facilities in Tuttlingen, further increases our goal of maximising the useful life of our instruments. This post-sale service allows dental professionals to ensure their instruments always perform at their best and for the longest time possible.

HU-FRIEDY TECHNICAL CARE CENTER

EXTENDING YOUR INSTRUMENTS LIFE!

SHARPENING
Instruments should be kept sharp and true to their original design. Dental procedures are most effective when using sharp instruments because they reduce fatigue, improve deposit removal, save time, enhance tactile sensitivity, and minimize patient discomfort.

PREPARATION
Our experienced service team in Tuttlingen checks, repairs and upgrades your Hu-Friedy Instruments.

MAINTENANCE
Regular maintenance extends your instruments life, improves reliability and ensures highest comfort and safety for patient and user.

CUSTOMIZATION
You can choose to customize your instrument, engraving the name of your office, its logo, or more simply, by procedural kit, making them easily identifiable for you and your team. Our laser marking technology allows our Technical Care Center Team to offer this.

Contact our experts for more information, please send us your enquiry: HFETechService@hu-friedy.com
